

Oracle 11g OCA Certification

How they Know you Know.

Oracle 11g Certified Database Administrators

Course Description

This Oracle Database 11g: Administration course explores the fundamentals of basic database administration. Expert Oracle University instructors will reinforce topics with structured hands-on practices that will prepare you for the corresponding Oracle Certified Associate exam.

ALSO takes the database administrator beyond the basic tasks covered in the first workshop. You'll begin by gaining a deep understanding of the most important responsibilities a DBA has: performing backup and recovery.

what you will learn

- Install Oracle Grid Infrastructure.
- Create and manage users.
- Install and configure an Oracle Database.
- Create and manage storage structures.
- Administer the Oracle Database.
- Understand the Oracle database architecture and how its components work and interact with one another.
- Perform backup and recovery.
- Diagnose and repair data failures with Flashback technology.
- Manage space to optimize database storage so you can respond to growing space requirements.
- Monitor and manage major database components, including memory, performance and resources.
- Secure the availability of your database through appropriate backup and recovery strategies.
- Automate DBA tasks with the Scheduler.

The target group:

- Database Administrators.
- Technical Administrator.
- Support Engineer.
- Technical Consultant.
