

# Administering the Web Server (IIS)

## Role of Windows Server

### Course Description:

- ◆ This course provides students with the fundamental knowledge and skills to configure and manage Internet Information Services.
- ◆ This course is intended to help provide pre-requisite skills supporting a broad range of Internet web applications, security, and knowledge to help support other products that use IIS such as Exchange and SharePoint. In keeping with that goal, this course will not focus on any particular web application or development practice.

### Target Group:

- ◆ This course is intended for IT professionals already experienced in general Windows Server and Windows Client administration. No prior experience with any version of Internet Information Services is assumed.

### Prerequisites:

- ◆ Experience with Windows networking technologies and implementation.
- ◆ Experience with Windows Server administration, maintenance, and troubleshooting.
- ◆ Experience with Windows Client administration, maintenance, and troubleshooting.
